

AEBI 423. SUSTAINABLE LAND USE.

Credits: 3

Offered by: Plant Science (Faculty of Agric Environ Sci)

Terms offered: Summer 2025

[View offerings for Summer 2025 in Visual Schedule Builder.](#)

Description

Management, preservation, and utilization of forage crops in sustainable tropical environments; examination of their value as livestock feed in terms of nutritional composition and impact on animal performance; land use issues as it pertains to forage and animal production in insular environments.

- Corequisite(s): AEBI 421, AEBI 425, AEBI 427
- Restriction: Restricted to students that are participating in the Barbados Interdisciplinary Tropical Studies Field Semester
- **Since this course is being taught abroad, la Fête Nationale du Québec (June 24th) and Canada Day (July 1st) statutory holidays will not be taken into consideration. Therefore, students are expected to attend their lectures on both Wednesday, June 24 and Wednesday, July 1, 2020.
- **Due to the intensive nature of this course, the standard add/drop and withdrawal deadlines do not apply. Add/drop is the third lecture day and withdrawal is the sixth lecture day.
- Project course AEBI 427 runs concurrently with the other courses (AEBI 421, AEBI 423 & AEBI 425) and the Mondays of each week are dedicated to AEBI 427.

Most students use Visual Schedule Builder (VSB) to organize their schedules. VSB helps you plan class schedules, travel time, and more.
