

# ANSC 250. INTRODUCTION TO LIVESTOCK MANAGEMENT

---

Credits: 3

Offered by: Animal Science (Faculty of Agric Environ Sci)

Terms Offered: Fall 2025

[View offerings for Fall 2025 in Visual Schedule Builder.](#)

## Description

Introduction to the scientific principles underlying animal livestock production as it relates to the consumer food chain. The world-wide demand for animal products, various areas of management (reproduction, nutrition, breeding, health, and welfare) that are used to provide those products by examining both conventional means as well as new and evolving technologies. How these techniques relate to some of the major production systems (dairy, beef, pig, and broiler and egg production) – primarily in a Provincial/Canadian context.

- Fall
- 3 lectures and one 2-hour lab

Most students use Visual Schedule Builder (VSB) to organize their schedules. VSB helps you plan class schedules, travel time, and more.
