Description

Individual guided research projects in bioengineering. Under the guidance of a research adviser, students will propose and implement a research plan that addresses a current gap in knowledge or industry need. Projects will be designed to provide experience in critical evaluation of primary research literature, experimental approaches and methodologies, quantitative analysis, mathematical modelling, and effective written and oral presentation of scientific ideas.

- Prerequisite(s): Permission of instructor.
- 1. (0-0-6)

Most students use Visual Schedule Builder (VSB) to organize their schedules. VSB helps you plan class schedules, travel time, and more.
