

BIOC 396. UNDERGRADUATE RESEARCH PROJECT.

Credits: 3

Offered by: Biochemistry (Faculty of Science)

Terms offered: Fall 2025

View offerings for Fall 2025 in Visual Schedule Builder.

Description

Independent research project with a final written report.

- Fall/Winter
- Prerequisites: MIMM 212 or BIOC 220 or BIOL 301 or an equivalent laboratory course in molecular and cell-biological methods, at least one term of undergraduate studies, and a CGPA of at least 3.0; or permission of instructor. A project proposal form must be completed by the student and instructor and approved by the course coordinator or his/her delegate before the start of the term. Instructors will list project-specific prerequisites with the project description.
- Restrictions: Departmental permission required. Student cannot be supervised by same instructor for two 396 Science courses. S/U option not permitted. Open to students in programs offered by the Faculty of Science only.
- Note that enrolment may be limited. Students are advised to start the application process well before the start of the term and to plan for an alternative course in the case that no suitable project is available. Individual projects may be suggested each term which may have project-specific prerequisites. Students may also approach professors to devise their own projects. Some projects may be accessible to students in other disciplines. See <https://www.mcgill.ca/science/research/undergraduate-research/science-research-courses> for more information about available projects and application forms and procedures

Most students use Visual Schedule Builder (VSB) to organize their schedules. VSB helps you plan class schedules, travel time, and more.
