

BIOL 314. MOLECULAR BIOLOGY OF

Credits: 3

Offered by: Biology (Faculty of Science)

This course is not offered this catalogue year.

Description

The molecular basis of human cancers, including analyzing the events that promote the formation of oncogenes and inhibit tumour suppressor genes, the biochemical properties of the proteins encoded by these genes, and their functions. Current molecular targets for cancer therapy and the concepts and consequences of inheriting mutations in genes that predispose to cancer.

- Fall
- 3 hours lecture
- Prerequisites: BIOL 200, and BIOL 201 or ANAT 212 /BIOC 212; or BIOL 219.

Most students use Visual Schedule Builder (VSB) to organize their schedules. VSB helps you plan class schedules, travel time, and more.
