

BIOL 438. SAND IN THE ANTHROPOCENE

Credits: 3

Offered by: Biology (Faculty of Science)

This course is not offered this catalogue year.

Description

A critical examination of the increasing global consumption of sand resources and the human-caused changes and impact on sediment dynamics, landscape evolution, ecological processes in freshwater ecosystem and conservation biology.

- Prerequisites: GEOG 272 or BIOL 206 or EPSC 355 or permission of the instructor.
- Restrictions: Not open to students who have taken or are taking GEOG 438.

Most students use Visual Schedule Builder (VSB) to organize their schedules. VSB helps you plan class schedules, travel time, and more.
