

# CHEM 232. ORGANIC CHEMISTRY PRINCIPLES.

---

Credits: 4

Offered by: Chemistry (Faculty of Science)

This course is not offered this catalogue year.

## Description

A consideration of basic principals of the atom including body imaging techniques followed by a general summary of organic chemistry, its application to biological processes and everyday life, including principles of bonding, structure and stereochemistry. Some physical chemistry will be given as it relates to the properties of air and breathing.

- Fall
- Restriction: Only open to students in the BN Program
- Restriction: Not open to students in the B.Sc. Program

Most students use Visual Schedule Builder (VSB) to organize their schedules. VSB helps you plan class schedules, travel time, and more.
