## Description

Basic components of effective health and safety policies, programs and current legislation (CSST, WHMIS, safety committees) focusing on proactive management to ensure employees have clearly defined accountabilities for accident prevention: hazardous materials, loss prevention, workers' compensation claims, employee assistance plans, work life quality, preventative health issues, and ergonomic standards.

Most students use Visual Schedule Builder (VSB) to organize their schedules. VSB helps you plan class schedules, travel time, and more.
