

# ESYS 200. EARTH-SYSTEM INTERACTIONS.

---

Credits: 3

Offered by: Earth & Planetary Sciences (Faculty of Science)

This course is not offered this catalogue year.

## Description

Topics related to climate change, biogeochemical cycles and natural resources are evaluated from an Earth System perspective. Exploration of the scientific literature in targeted areas of Earth system science with a focus on human-Earth interactions. Emphasis is on complex global issues that cross traditional disciplines, and interpreting and communicating academic knowledge derived from Earth system research.

- Winter
- 3 hours lecture
- Prerequisite(s): ENVR 200 or permission of instructor.

Most students use Visual Schedule Builder (VSB) to organize their schedules. VSB helps you plan class schedules, travel time, and more.
