Credits: 3

Offered by: Medicine (Graduate Studies)

Terms offered: Fall 2025

[View offerings for Fall 2025 in Visual Schedule Builder.](#)

Description

Introduction to foundational principles of science and experience in relating the core assumptions and purposes of research to a broad audience. Combines theory, science writing, science communication, research design and dissemination adapted to research context. Covers topics ranging from the role of science, the construction and effective communication of a research question, the merits of different approaches to research, roles and responsibilities of scientists.

Most students use Visual Schedule Builder (VSB) to organize their schedules. VSB helps you plan class schedules, travel time, and more.
