Description

Half theory and half practical exercises using Rotman Interactive Trader software in the trading lab. Theory: principles of trading in different asset classes. Software simulated cases: the actual market environment is simulated where class participants trade in real time. As the market is running, students, given previously prepared strategies, start affecting market prices and see their profit and losses, given the strategies they implement.

- Corequisite: FINE 441
- Prerequisite(s): MGCR 341
- Restriction(s): Not open to students who have taken FINE 434 when the topic was "Managing the Risk of Trading Strategies".

Most students use Visual Schedule Builder (VSB) to organize their schedules. VSB helps you plan class schedules, travel time, and more.
