

GEOG 350. ECOLOGICAL BIOGEOGRAPHY.

Credits: 3

Offered by: Geography (Faculty of Science)

This course is not offered this catalogue year.

Description

The study of the patterns of distribution of organisms in space and time with emphasis on plant communities. Ecological, geographical, historical and anthropological factors affecting these distribution patterns will be discussed. Particular consideration is given to methods for description and classification of plant communities.

- Fall
- 3 hours
- Prerequisite: GEOG 203 or ENVR 200 or ENVR 202
- Note: Offered at Macdonald campus in alternate years.

Most students use Visual Schedule Builder (VSB) to organize their schedules. VSB helps you plan class schedules, travel time, and more.
