

# GEOG 471. ARCTIC SYSTEM SCIENCE

---

Credits: 3

Offered by: Geography (Faculty of Science)

This course is not offered this catalogue year.

## Description

The complex Arctic system and its interrelated elements as a coupled system. Topics include: the physical, biological, and social processes that shape the Arctic, including the Arctic atmosphere and ocean, sea ice, permafrost, and terrestrial ecosystems. Unique challenges and opportunities in this fragile and rapidly changing environment, including current research in Arctic science.

- Prerequisites: ATOC 215 or ENVR 200 or GEOG 203 or permission of the instructor.

Most students use Visual Schedule Builder (VSB) to organize their schedules. VSB helps you plan class schedules, travel time, and more.
