

GEOG 520. AGRICULTURE, ENVIRONMENT, AND FOOD SECURITY.

Credits: 3

Offered by: Geography (Faculty of Science)

This course is not offered this catalogue year.

Description

This course will consider multiple dimensions of the food security-environment challenge, including the biophysical, economic, nutritional, socio-political, and policy/institutional. It will use a global perspective, drawing upon both global-scale research as well as case studies from different regions of the world to understand the geography of agricultural production, its environmental footprint, and of malnutrition.

- Prerequisite(s): ENVR 201, and NUTR 341 or any 300 or 400-level course in agricultural science, ecology, environment, economics, geography, or nutrition, or with permission of instructor.
- Restriction(s): Open to U2 and U3 undergraduate students with permission of instructor.
- Restriction(s): Open to graduate students.
- Restriction(s): Restricted to U2 and U3 students.

Most students use Visual Schedule Builder (VSB) to organize their schedules. VSB helps you plan class schedules, travel time, and more.
