

IMED 401D2. INTERNAL MEDICINE CLERKSHIP.

Credits: 4

Offered by: Medicine (Faculty of Medicine & Hlth Sci)

This course is not offered this catalogue year.

Description

The main goals of the internal medicine clerkship are to further develop the student's ability to function as an increasingly independent, but supervised and safe, clinician in an interprofessional health care team. Students learn, while practicing, both for and from patients. Students, under the supervision of residents and attending physicians, are responsible for performing and documenting histories, physicals, lab and radiology data summaries, and patient problem lists for newly admitted patients, as well as patients being seen in consultation in the outpatient and non-internal medicine ward settings; and the ongoing care, management, follow-up and discharge planning of patients in each of the above settings.

- Prerequisite: IMED 401D1
- No credit will be given for this course unless both IMED 401D1 and IMED 401D2 are successfully completed in consecutive terms
- IMED 401D1 and IMED 401D2 together are equivalent to IMED 401
- Restriction(s): Open only to students enrolled in the M.D., C.M. program.

Most students use Visual Schedule Builder (VSB) to organize their schedules. VSB helps you plan class schedules, travel time, and more.
