

INSY 610. MANUFACTURING INFORMATION SYSTEMS

Credits: 3

Offered by: Management (Graduate Studies)

This course is not offered this catalogue year.

Description

Introduction to the key concepts, frameworks, technologies, and applications of information systems (IS) related to the manufacturing industries. Focus on the strategic value of IS, the enabling role of IS in organizational changes and product/process innovation, the management methods of IS, and recent IT advancements related to manufacturing industries. This includes the fundamental theories underlying the impacts of IS, issues related to the management and use of IS, IS-related key technologies and their recent advancements, and IT-driven industry transformation.

- Restrictions: Not open to students who have taken MGSC 690 when topic was "Manufacturing Information Systems".

Most students use Visual Schedule Builder (VSB) to organize their schedules. VSB helps you plan class schedules, travel time, and more.
