

# MGSC 575. APPLIED TIME SERIES ANALYSIS MANAGERIAL FORECASTING.

---

Credits: 3

Offered by: Management (Desautels Faculty Management)

This course is not offered this catalogue year.

## Description

Management applications of time series analysis. Starting with ratio-to-moving average methods, the course deals successively with Census 2, exponential smoothing methods, the methodology introduced by Box and Jenkins, spectral analysis and time-series regression techniques. Computational aspects and applications of the methodology are emphasized.

- Prerequisite (Undergraduate): MGCR 271.
- Restriction: Open to U2 and U3 students.

Most students use Visual Schedule Builder (VSB) to organize their schedules. VSB helps you plan class schedules, travel time, and more.
