Credits: 3

Offered by: Ingram School of Nursing (Ingram School of Nursing)

Terms offered: Winter 2026

[View offerings for Winter 2026 in Visual Schedule Builder.](#)

Description

This course will build on previous knowledge from NUR1 209, and focus on the study of the physiology of organ systems and the pathophysiologic alterations in health across the lifespan, looking at selected diseases of the reproductive, cardiovascular, renal, digestive, and neurological, endocrine and hematological systems that are the most prevalent in North America. It will explore concepts of disease causation in the: acquired, immune, infectious, carcinogenic, genetic, and biochemical alterations in health in selected body systems. There will be an emphasis on etiology, cellular and systemic pathophysiologic responses, clinical manifestations, diagnostic, and treatment modalities.

- Prerequisite(s): NUR1 209

Most students use Visual Schedule Builder (VSB) to organize their schedules. VSB helps you plan class schedules, travel time, and more.
