

# ONCO 615. PRINCIPLES AND PRACTICE OF CLINICAL TRIALS.

---

Credits: 3

Offered by: Gerald Bronfman Dept Oncology (Graduate Studies)

Terms offered: Fall 2025

[View offerings for Fall 2025 in Visual Schedule Builder.](#)

## Description

An overview of the design, conduct and analysis of clinical trials. Topics include types of clinical trials, study designs, practical considerations when setting up a clinical trial, ethics, regulatory requirements, trial monitoring, data management, investigator responsibilities and statistical analysis.

- Restriction: Open to students who have an undergraduate degree or professional designation in fields related to health or biomedical disciplines. In the absence of the latter, the instructor's permission is required. Priority will be given to students enrolled in the Graduate Diploma in Oncology program.
- English is the language of instruction but students may present in either of the official languages.

Most students use Visual Schedule Builder (VSB) to organize their schedules. VSB helps you plan class schedules, travel time, and more.
