

PHYS 320. INTRODUCTORY

Credits: 3

Offered by: Physics (Faculty of Science)

This course is not offered this catalogue year.

Description

A survey of astrophysics ranging from stars and planets, to compact objects, galaxies, and the large-scale evolution of the Universe. A calculusbased course, with a focus on simple mathematical derivations that capture the essential physics.

- Prerequisites: MATH 222; PHYS 230 or PHYS 260 or permission of the instructor.
- Not open to students who have taken PHYS 214.
- Fall

Most students use Visual Schedule Builder (VSB) to organize their schedules. VSB helps you plan class schedules, travel time, and more.
