

# PLNT 221. INTRODUCTION TO FUNGI.

---

Credits: 1

Offered by: Plant Science (Faculty of Agric Environ Sci)

This course is not offered this catalogue year.

## Description

Field and laboratory survey of local representatives of the major groups of fungi, including edible and poisonous mushrooms. The role of each group in terrestrial and aquatic ecological niches will be studied with respect to saprophytism, parasitism and symbiosis. Economic importance of fungi in medicine and biotechnology will be introduced.

- Four 4-hour field labs, given during the second 4 weeks of semester
- Second 4 weeks of term only
- This course carries an additional charge of \$31.15 to cover the cost of transportation (bus rental) for local field trips. The fee is refundable only during the withdrawal with full refund period.

Most students use Visual Schedule Builder (VSB) to organize their schedules. VSB helps you plan class schedules, travel time, and more.
