Description

Environmental problems like climate change, deforestation, biodiversity loss, and ocean acidification transcend national borders. Solving these problems will require global cooperation on an unprecedented level. This course will explore the challenges of contemporary global environmental governance and the innovative solutions being advanced at the community, municipal, provincial, national, and international levels.

- Prerequisite(s): A basic course in International Politics.

Most students use Visual Schedule Builder (VSB) to organize their schedules. VSB helps you plan class schedules, travel time, and more.
