

POTH 305. STATISTICS FOR EXPERIMENTAL DESIGN OT/PT

Credits: 3

Offered by: Phys and Occ Therapy (School of Phys & Occ Therapy)

This course is not offered this catalogue year.

Description

The statistical analysis of research data obtained from experimental designs, including introduction and review of basic statistical concepts, different types of analysis of variance (ANOVA) and simple and multiple linear regression.

- Prerequisite: Successful completion of POTH 204 or an equivalent introductory statistics course.
- Restriction: Not open to students who have taken or are taking PSYC 305 or equivalent.

Most students use Visual Schedule Builder (VSB) to organize their schedules. VSB helps you plan class schedules, travel time, and more.
