

POTH 628. INTRODUCTION TO REGRESSION ANALYSIS.

Credits: 3

Offered by: Phys and Occ Therapy (Graduate Studies)

This course is not offered this catalogue year.

Description

Commonly used regression modelling approaches in the health sciences, linear and logistic regression models. Topics include: general concepts behind statistical model building, selection of appropriate model, preparatory descriptive analyses prior to regression modelling, fitting, interpreting and evaluating some linear and logistic regression models.

Most students use Visual Schedule Builder (VSB) to organize their schedules. VSB helps you plan class schedules, travel time, and more.
