

PSYC 319. COMPUTATIONAL MODELS - COGNITION.

Credits: 3

Offered by: Psychology (Faculty of Science)

This course is not offered this catalogue year.

Description

Introduction to the purpose, design, and role of computational modeling in the cognitive sciences. Domains examined will include memory, categorization, and language. Focus will be on computational models to attain a better theoretical understanding of human behaviour. New trends, including the use of big data and machine learning.

- Restrictions: U2 or above. Restricted to students in Psychology, Linguistics and Cognitive Science.

Most students use Visual Schedule Builder (VSB) to organize their schedules. VSB helps you plan class schedules, travel time, and more.
