

PSYT 600. DIGITAL MENTAL HEALTH CARE

Credits: 3

Offered by: Psychiatry (Graduate Studies)

Terms offered: Summer 2025

[View offerings for Summer 2025 in Visual Schedule Builder.](#)

Description

Current and emerging trends of eHealth, highlighting both local and international applications, interventions, and research in the mental health context. Critical issues related to the integration of eHealth applications and interventions in health care, community care and public health. Topics include the definition and taxonomy of eHealth; the interdisciplinary foundation of the eHealth and eMental health fields; data capturing and repository systems (e.g., electronic health records [EHR] systems); widely diffused and emerging technologies (e.g., mobile apps, virtual communities, virtual reality (VR), video games, artificial intelligence (AI), and machine learning); patient engagement in designing eHealth applications; patient safety standards; applications evaluation.

- Restrictions: Priority given to psychiatry department students.
- Some lectures will be held online via Zoom.

Most students use Visual Schedule Builder (VSB) to organize their schedules. VSB helps you plan class schedules, travel time, and more.
