

SOCI 504. QUANTITATIVE METHODS 1.

Credits: 3

Offered by: Sociology (Faculty of Arts)

This course is not offered this catalogue year.

Description

An introduction to basic regression techniques commonly used in the social sciences. Covers the least squares linear regression model in depth and may introduce models for discrete dependent variables as well as the maximum-likelihood approach to statistical inference. Emphasis on the assumptions behind regression models and correct interpretation of results. Assignments will emphasize practical aspects of quantitative analysis.

- Prerequisites: SOCI 350 and SOCI 461 or equivalents

Most students use Visual Schedule Builder (VSB) to organize their schedules. VSB helps you plan class schedules, travel time, and more.
