## Description

During this four-week course, students will build on history-taking and physical examination skills, develop diagnostic and clinical reasoning skills, and expand their knowledge of surgery-related problems. The student will also learn the pathophysiology of surgical conditions and practice procedural skills relevant to the practice of surgery.

- Restriction(s): Open only to students in the M.D., C.M. program.

Most students use Visual Schedule Builder (VSB) to organize their schedules. VSB helps you plan class schedules, travel time, and more.
