

BIORESOURCE ENGINEERING

About the Department of Bioresource Engineering

In cooperation with the Faculty of Engineering, the Department of Bioresource Engineering in the Faculty of Agricultural and Environmental Sciences offers Bachelor of Engineering (B.Eng.) programs in Bioresource Engineering that include a B.Eng. (Bioresource) major as well as optional Honours and Professional Agrology programs. Like most B.Eng. programs, these accredited engineering programs lead to a professional engineering license. The Faculty of Agricultural and Environmental Sciences is located on McGill University's Macdonald Campus, 35 km away from McGill University's Downtown Campus. Many courses offered by the Department of Bioresource Engineering (subject code BREE) may interest students in other engineering programs.

For details about program requirements for the B.Eng. (Bioresource), refer to the Bachelor of Engineering (Bioresource) - (B.Eng. (Bioresource)) page.
