

B.A. FACULTY PROGRAM IN ENVIRONMENT

Website: mcgill.ca/environment/undergraduate-studies/program-advising

The B.A. Faculty Program comprises two components: core and concentration.

Core: In the core component, the four introductory courses and an intermediate-level course expose students to different interdisciplinary perspectives, approaches, and world views to help them understand the complexity and conflicts that underlie most environmental problems. In the two senior-level courses of the core component, students will apply the general and specialized knowledge acquired through the rest of their program, to the analysis of a selection of contemporary environmental problems. Students will be challenged by the core program to look beyond the confines of their individual views of environment.

Concentration: In addition to the core program, students choose a concentration, a transdisciplinary study of a particular theme or component of the environment. The requirements and complementary course sets vary between concentrations.

B.A. students can choose one of the following concentrations within the B.A. Faculty Program in Environment:

- Ecological Determinants of Health in Society
- Economics and the Earth's Environment
- Environment and Development

Available Programs

- Faculty Program Environment - Ecological Determinants of Health in Society (B.A.) (54 credits)
- Faculty Program Environment - Economics and the Earth's Environment (B.A.) (54 credits)
- Faculty Program Environment - Environment and Development (B.A.) (54 credits)

The above listed three concentrations are only available to students enrolled in the B.A. Faculty Program in Environment.

Location

Downtown Campus

3534 University Street
Montreal, Quebec H3A 2A7
