

# PROGRAM OVERVIEW

---

**Due to curriculum changes, program components and courses may be revised. Revisions will be posted in the learning management system.**

The current M.D.,C.M. curriculum, implemented in Fall 2013, marking one of the largest renewals in Faculty history, is a product of five years of reflection, multidisciplinary consultation, planning, and development. Rooted in the principle of "The Patient at Heart and Science in Hand", the curriculum fully recognizes the importance of family medicine in addressing current needs, while simultaneously providing a program that is firmly rooted in science. Also significant is interdisciplinary learning, as well as offering a longitudinal experience where the major themes are learned in tandem rather than in isolation.

More information on the M.D.,C.M. program can be found on the UGME website.
