COGNITIVE SCIENCE

About Cognitive Science

Cognitive Science is the interdisciplinary study of intelligent behaviour in humans, animals, and machines. It encompasses the traditional disciplines of Computer Science, Linguistics, Neuroscience, Philosophy and Psychology. By taking a computational view of the mind, Cognitive Science seeks to establish a mechanistic understanding of the mental processes underpinning intelligent behaviour, inform our understanding of our mind, and guide the design and development of intelligent systems.

Students wishing to complete the **Minor in Cognitive Science** should contact the Cognitive Science Program Advisor if there are any questions about the requirements. Please refer to the Cognitive Science program page for more information.
