

MUSIC FOR SCIENCE STUDENTS

Music Minors and Courses

The Schulich School of Music offers music minor programs and courses that are open to students in the Faculty of Science. Bachelor of Science (B.Sc.) students should consult with a Science academic advisor to determine which music minor and/or music courses are acceptable for credits towards the science degree.

Music Minors Open to All Undergraduate Students

Students enrolled in a bachelor program other than Music are eligible to apply for a number of music minors offered by the Schulich School of Music. The following two music minors are popular music program options among Bachelor of Science (B.Sc.) students:

- Musical Applications of Technology Minor (B.Mus.) (18 credits)
- Musical Science and Technology Minor (B.Mus.) (18 credits)

A detailed list of music minors and application detail are found on Schulich School of Music website.

Music Courses Open to All Undergraduate Students

Students may also register for one or more music courses without being in a music minor program. A list of music courses open to all undergraduate students can be found on Music Electives website. Bachelor of Science (B.Sc.) students should consult with a Science academic advisor which music course(s) can be accepted for credits towards the science degree prior to registration.
